

EXPERTEZE is a non-profit 501(c)3 organization promoting STEMM (Science, Technology, Engineering, Mathematics and Medicine.) education and research and dedicated to creating a diverse and experienced workforce for the industry.

OUR RECENT ACTIVITIES

EXPERTEZE has organized several programs for students, teachers and industrial community. We recently conducted a seminar called "Bioinformatics Boot Camp for Faculty and Students", an online week long program that provides a bird's eye view of bioinformatics. This is followed by an online four week program called "Experteze Independent Projects" in which participants engage in exciting group oriented bioinformatics projects. Participants organize into groups and select a research project to work on. This exercise is intended to help participants learn aspects of collaborative research and to provide an introductory experience for performing future Experteze research projects.

Experteze Circle of Excellence is a social media forum for STEMM, helping students to network and sustain their interest in STEMM topics. It includes several activities including:

- Webinars and special topical seminars, online classes, guest lectures.
- Online/virtual Meetups.
- Forums / online chatrooms / social media.
- Mentoring and coaching services.
- Quizzes, competitions, team building exercises.
- Hands-on workshops, demonstration and outreach programs.
- Referral networks & career opportunity seminars.
- Experteze Journal of Research (to post research publications by members).
- Complementary and discounted products and services (in collaboration with participating vendors).
- Scholarships/fellowships/other financial and non-financial incentives.
- Free/discounted textbooks and other promotional materials.
- Local chapters, newsletters and other support.

Upcoming Events

- ❖ **Experteze Independent Projects** (fee charged)
Online program for hands-on group oriented bioinformatics projects. (November 9, 2020 - December 21, 2020)
- ❖ **Experteze introduces Circle of Excellence program** in various STEMM topical areas, including Mathematics, Physics, Chemistry, Biology, Computer Science and Economics. We are starting weekly online global meetups in Mathematics and Economics. Please refer to our website for more details.
- ❖ **Preliminary Assessment Examination for joining Experteze Research program**
(December 1, 2020 - December 7, 2020)
